Brief in support of Plaintiff

See ***Evolution is Unscientific***, enclosed

(The enclosed resume is to suggest Plaintiff may know a thing or two about science.)

There are at least three arguments against saying this is too sudden and unexpected:

(1) Blue Mt. School District should have known. Is it without the means to hire competent lawyers?

(2) The government, of which the public schools are a part, should not embark on anything unless and until it is absolutely sure it is constitutional. If it does, it has no one to blame but itself for the consequences.

(3) The public schools overrate their importance. What will they teach that is it more important than their kids learning that even The Blue Mountain School district has to obey the Constitution?
